District Information: The district is a groundwater conservation district created under and essential to accomplish the purpose of Section 59, Article XVI of the Texas Constitution. It was created as a part of S.B. No 1847 passed by the Texas legislature in May of 2005 the district encompasses all of Duval County and is located within Groundwater Management Area 16 and Regional Water planning Group

Amended Rule on Well Plugging Program:

Allows an assignment of rights to allow applicants easier access and eligibility into participation. For more information and details please contact the office.

Where does water come from and where does it go?

The Duval County Groundwater Conservation District is currently taking applications for their water well testing pilot program. Interested applicants should contact general manager Jorge (George) L. Gonzalez for more details or visit at our office located at 231 East Railroad Avenue in Benavides.

The purpose of the district, as per Texas water code 36, Section 36.00.15, is to provide for the conservation, preservation, protection, recharging and prevention of waste of groundwater and of groundwater reservoirs or their subdivisions and to control subsidence caused by the withdrawal of water from those reservoirs. It has an obligation under Texas Water Code 36.107 to develop a groundwater management plan that will state how the district will meet that purpose. Under Texas Water Code 36C Section 36.101, the District has the authority to adopt and enforce rules that the district feels are needed to carry out that purpose.
